

JOENISHA

Perfection Traffic Control, LLC

Flagger

Joenisha was employed with part-time hours when she decided to visit WorkSource Spokane to see how the team of Career Coaches could help develop of career track that could implement her education and certificates.

She originally learned about employment services at WorkSource Spokane when she participated in a program offered by the Department of Social and Health Services (DSHS). A few years later, she took advantage of all the support and resources to begin planning out her career track.

“

I worked one-on-one with Career Coaches Patty, Marcia, and Charlie, and spent a lot of time in WorkSource Spokane's Technology Hub and the computers available.

”

Through dedication and hard work, Joenisha found an opportunity to become a traffic control flagger. "It took me five days working with WorkSource to find this opportunity, working around my part-time work schedule to gain full-time employment elsewhere", she said. The most significant support she received was the tools and consistent guidance from different Career Coaches.

Joenisha is most excited for her professional development and getting back on track to utilize her education for employment purposes. "I feel like it can't get any better than this. My hope is to work with the Department of Transportation in the years to come!"
